Good afternoon, Mike,

Sorry for the late response here. After some internal discussion, our suggestion for the Slaton property would be to continue to approach this from a stormwater perspective as Lowell is covering. There was no indication in the field that there is anything other than soil and broken up concrete blocks within the material used to fill in the two areas on the property, and based on the surrounding outcrops the material has been placed very close to or on bedrock. Therefore, discharge from the bottom of the prism at the swale, if any, would be most indicative of any threat to water quality. If new information comes to light regarding what is in the fill area, should operations resume, or if the data or observations indicate there are non-inert materials in the fill, we could reexamine the case from a Title 27 perspective.

Thank you,
John Murphy

John,

As a follow up from the waterboard in an email / letter, what are the waterboards requirements if the operation stops and the fill is left in place or if the property owner continues his filling operation? Does the waterboard have any objections?

Again, we are available to discuss.

Thank you,
Mike

Hello John,

Unfortunately, CalRecycle is out Wednesday (12/18). Thursday or Friday morning could work. I do have another suggestion. If the waterboard has spoken to counsel and they have no further objections to the placement of fill at the property, please send an email / letter similar to what Lowell has provided. Calrecycle will then move forward with discussion with the LEA on categorizing the site.

Thanks,
Mike

Hello Mike,

Since it is Board Meeting week, we are mostly unavailable the remainder of the week. Perhaps new Wednesday afternoon in the 1-3:30 block?

Best,

John

Brad / John,

Are you available Thursday (12/12) morning to discuss the site?

Just should be about a 30-minute meeting.

Thank you,
Mike

Hi Mike,

From a stormwater perspective, they have satisfied the requirements. The submitted a site winterization plan with photos of BMPs installed. I will be requesting more photos to see how the site is holding up during the winter. We will inform them they must obtain IGP coverage if they will be processing/grinding concrete or asphalt in the future. I will follow up with a letter to the owner and copy everyone here,

Brad / John / Lowell,

Checking on availability to have a discussion on path forward for the Slaton Property at 18955 Industry Way in Sonora, CA. Per our last call, the waterboard was going to check with counsel on their resolution for the property.

Agenda:
Discuss property proposed category as Inert Debris Type A or B
Discuss needing to know property owners' plan / intention for land use
What should the property owner provide? Define waste footprint…figure?

Let me know which date / time works best for you.

Wednesday (12/11) 9am to noon
Thursday (12/12) 9am to noon
