Yes, that is correct…just for the intake, processing, storing, sale, and use (non-fill) if he decides he still wants to do those activities.

Debbie,

Just a quick question for my understanding. Is the meeting with Isabelle to understand requirements and include that language of the procedure in obtaining a CalRecycle facility permit for processing material (no filling) on his property? That would be good to include in the Order.

Thank you,
Mike

Hi Isabel,
,
We are just checking in with you regarding the requirements for an inert debris processing facility for the Slaton property with the "Unpermitted Solid Waste Disposal Site" (fill) located on the property. We have been working with CalRecycle CIA folks cc'd above regarding the fill. Should Mr. Slaton want to move forward with continued process on the site we want to make sure he is complying with the regulations under the definition of which he is operating.

Could we set up a meeting (probably just you and me) to verify and be cautious moving forward. This is a contentious operation near residences.

Best,

Debbie Larson, REHS
