Closed, Illegal, and Abandoned Disposal Sites Program
The Closed, Illegal, and Abandoned (CIA) Sites Program helps Local Enforcement Agencies (LEAs) inspect, investigate, remediate, and enforce state minimum standards on the following types of disposal sites:
• Legacy – Disposal sites that stopped accepting waste prior to January 1, 1988.
• Illegal – Disposal sites that are currently conducting disposal activities illegally without a solid waste facility permit.
• Abandoned – Disposal sites that conducted historical disposal activities but were abandoned with no responsible party identified.
There are about 1,500 CIA sites identified in CalRecycle's Solid Waste Information System (SWIS) database.
For information and assistance with CIA sites...
Local Enforcement Agencies are the first point of contact if you are:
• A parcel owner looking for information on your land
• A consultant hired by a parcel owner
• Not the landowner, but have a concern or complaint
• Looking for information on previous land use and remediation assessment
